

# Medical Litigator™ Databases

Current through April 25, 2007

The tabbed Medical Litigator page on Westlaw allows you to search both medical and legal sources with a single search. You can search medical guides and summaries, medical journals and abstracts, medical images, legal texts and periodicals, case law, and jury verdicts without having to access multiple databases. Documents retrieved by your search are grouped into relevant categories. For example, your search result may include a section for medical definitions, a collection of medical journal articles, case law, and jury verdicts relating to your search.

For more information on the Medical Litigator page, see the *Medical Litigator on Westlaw* research guide.

**Note** Your search result may include documents from databases not included in your plan. For more information, contact your account manager or sales representative.

This database list incorporates databases that are included in the Medical Litigator Premier Library on Westlaw (WestlawPRO®), as well as other databases that are searched at the Medical Litigator page. Databases that are included in the Medical Litigator Premier Library but are not included in a search at the Medical Litigator page are not listed.
