West's Government Select Custom PRO product was built for our government customers and offers them the flexibility to build a legal information solution tailored to their unique needs. Government Select allows customers to select the content that not only fits their needs, but also their budget. Customers are not required to purchase a broad all-inclusive plan. They do not pay for any content they do not select and have the opportunity to continually grow their plan as their needs change. This Custom PRO product also gives customers access to all the powerful tools of Westlaw including, StatutesPlus, KeyCite and WestClip.

A Government Select plan requires a customer to include certain core content and then allows the customer to supplement the core content with optional modules tailored to meet the customer's needs and budget. Pricing is established by the point value assigned to the optional module content, number of users in the agency or firm and pricing level of the state content. The attached retail rates may be locked in for one year or multiple years.

4301.I - LiveNote®
LiveNote SR & Realtime

LiveNote SR software is a robust transcript-and evidence-management tool that helps users to organize the facts of a case, analyze exhibits, and summarize all of the transcripts.

With LiveNote SR users can:

- Effectively manage all of the transcripts and related evidence in a case
- Run sophisticated full-text searches across all transcripts in a case to quickly retrieve the most critical testimony
- Annotate and analyze all the transcripts
- View hyperlinked exhibits with a single click
- Share cases over a network so multiple team members can work simultaneously, or save a project locally and synchronize their work to the network case later

LiveNote Realtime enables users to receive live transcript text, audio, and video directly from the court reporter or videographer. Users can then markup live text by scrolling on the computer, search earlier testimony, and privately communicate with on-site or off-site team members.

Using the LiveNote LEFMaker™ utility included in the LiveNote Exhibits package, users can easily create hyperlinks from any exhibit reference in the transcript to the actual, scanned exhibit. The cohesive package is then imported into their LiveNote SR case, so they never have to dig through boxes of documents to review a key exhibit. The exhibit hyperlinks can connect to virtually any litigation database product, enabling users to easily retrieve the document’s history, issues, OCR, and production details.
