

# Westlaw: preferred over any other online legal research service

At West, we strive to provide legal professionals the research tools they need to be more efficient and get better results faster. Maybe that's why, in a recent independent third-party study<sup>\*</sup>, litigators preferred Westlaw<sup>®</sup> over any other online legal research service.

## 'About the study

This independent, third-party study sponsored by Thomson West was conducted by Lieberman Research Worldwide in May 2008. Double-blind methodology was used, meaning neither the survey creators nor the respondents were informed of the objective of the study, or knew who sponsored the study. The respondents

were litigators who identified themselves as active online researchers. They represented a cross-section of age, gender, and practice segments – from small, medium, and large law firms to the corporate and government sectors. **For complete details of the study, go to [west.thomson.com/westlaw](http://west.thomson.com/westlaw).**

# Westlaw Advantages

## 1. Comprehensive Legal Content

**Primary Law** – It's the cornerstone of legal research, and Westlaw provides exclusive access to leading primary law publications such as **USCA**®, the **National Reporter System**®, and the industry's only **annotated CFR**. All the same titles found in law libraries across the United States – online, all in one place.

**Analytical Materials** – Westlaw has the complete **American Law Reports (ALR)**®, one of the leading research and case-finding tools. Westlaw also includes top jurisdictional and practice area analytical resources such as **Wright and Miller's Federal Practice and Procedure**®, **State Jurisprudence** titles, **Williston on Contracts**®, and more.

**Litigation Materials** – Nobody can match West's commitment to providing litigators the materials they need most. Our comprehensive offering includes the largest online collection of **Briefs** (1.6 million), **Trial Documents** (3.2 million), and **Expert Testimony**, as well as access to **ALM**® **Jury Verdicts**.

## 2. Tools to Help you Find it Faster

**Editorial Enhancements** – West attorney-editors categorize, organize, and summarize the law to help you find what you need quickly and ensure that you don't miss anything. And while other legal research providers reiterate the text of the opinion, West **Headnotes** are written by attorney-editors and categorized within the **West Key Number System**®, the most comprehensive legal indexing system for caselaw.

**Linking** – Exclusive linking connects you to documents that would otherwise be missed. For instance, **ResultsPlus**® automatically links you from within a document or a search result to relevant treatises, **ALR** articles, and West Key Numbers. Plus, we add more than five million links to Westlaw every year, so you can get to what you're looking for faster.

**Searching** – Westlaw's search technology is unsurpassed because, unlike some search engines, it can precisely handle common legal phrases such as "at will" as well as more sophisticated grammatical and numeric queries. It's more helpful, too. With **Smart Tools**® search suggestions, Westlaw can deliver on-point results, even if you haven't constructed the perfect query.

**24/7/365 Reference Attorney Assistance** – Westlaw's 160 bar-admitted reference attorneys offer world-class service and can help you find what you need. They are always available (24/7/365) – and always **free!**

## 3. Trusted Accuracy

**Case Corrections** – West's 22-step editorial process ensures that every arriving case is thoroughly checked for accuracy before it's posted to Westlaw. In fact, West attorney-editors make more than 100,000 case corrections every year!

**KeyCite**® – KeyCite provides graphical warnings for statutes that are no longer valid, while other citators do not. Perhaps that's one of the many reasons it's the citator most preferred by litigators.
